

The Most Advanced  
Online Education  
for Boaters.

## ACHIEVE CERTIFICATION LEVELS ONLINE

The most advanced online education resource.

NauticEd is the world's most advanced online, e-learning, boating education resource. It educates sailors and power boaters across a broad spectrum of operations on-board modern 30-50 foot vessels.

All NauticEd courses are offered via 10 key learning modules plus a variety of clinics and mini modules focusing on specific manufacturer products. In each of the modules and clinics, students learn important lessons about various aspects of boating. The mini modules encompass everything from operating specific makes and models of boats to learning about equipment. Tests are given via NauticEd's proprietary e-learning and e-Testing technology.

Upon passing each course, certificates are provided to students. Certification levels mark each student's progress in depth of knowledge.

A personalized resume is also available online. This resume shows each student's certification levels, and can show charter companies worldwide the competency of the student.

Over time, NauticEd students can return to add sailing certifications, get recertified, and to take a clinic to update and improve theoretical and practical sailing skills.

## NauticEd can help you brush up on your sailing skills.

Learning to sail takes more than a weekend certification course. Sailing is a lifestyle and NauticEd will give you the educational background you need to match your theoretical knowledge of sailing with your practical skills.

Whether you've sailed before or not, our training program can help you improve your skills, lead a crew or just have more fun sailing. Ultimately, NauticEd can teach you how to sail with 100% confidence in a variety of conditions.

## Become a Certified NauticEd Captain.

Do you dream of captaining a boat and sailing to incredible places like the Caribbean, the South Pacific or the Mediterranean? Then NauticEd is the key to making your dream come true.

Our Captain's graduation program is a series of comprehensive courses that teach in-depth skills. The program combines theoretical training with practical sailing experience and serves three main purposes:

- To properly introduce boating to new sailing enthusiasts
- To give new sailors the skill and confidence to easily complete day sails
- To help experienced sailors increase their depth of knowledge to handle boats in various conditions

The program offers three certification levels. Within the first tier, students get up-to-speed on simple theory and practical training. In latter tiers, students achieve greater levels of confidence in their skippering abilities and skills.

Under the Skipper To Captain program, NauticEd monitors each sailor's progress with an online resume. This system tracks the theory, certifications and practical experience gathered. This comes in handy when you book your sailing vacations and need to provide your sailing experience to the charter companies.

### Each NauticEd Resume includes:

- Theory certifications gained from NauticEd and other organizations
- Practical experience gained through sailing and instruction
